Dive deeper

Take your Kontent.ai-powered apps further with the following APIs and features.

- [Smart link SDK](#) automatically creates [edit links in your web app](#) based on HTML data attributes provided in your app. The SDK also lets you connect your website with [Web Spotlight](#).
- Synchronize latest content changes with [webhooks](#) or via [Sync API](#) to [keep your cache up to date](#).
- [Image transformation API](#) is a real-time image manipulation and optimization API. Check our [image optimization guide](#) to speed up image delivery in your app.
- [Custom Elements API](#) lets you implement your own custom elements and use methods from this JavaScript API.

What's next?

- Follow [best practices for getting content](#) to ensure your content and code is scalable and maintainable.
- Explore [integration capabilities](#) of Kontent.ai to create a coherent and robust experience for developers and content editors.
- Once you have your Kontent.ai-powered web app running, focus on [SEO optimization](#) and explore the benefits of [Edge computing](#).
- Not sure what's what in Kontent.ai? Check our [glossary of terms](#).
